System

LEADERS™ is a paperless, advanced and secure, web-based reporting system that is used to accumulate and analyze data from multiple sources, while providing the functionality to manage and aggregate data at a service or multi-service level.

LEADERS is a centralized data repository for all Fire Departments and EMS Services which allows seamless integration and interchange of information between both kinds of services. With **LEADERS**, ambulance and fire services are easily able to satisfy EMS (NEMESIS) & Fire (NFIRS) reporting requirements, process billing, and improve operations without a major investment and without learning complex new technology. It also works seamlessly with most billing systems. This results in faster data transfer which means faster return of outstanding revenues.

LEADERS™

LEADERS easily generates EMS & Fire data into valuable information that is quickly understood and can be used to justify resource funding requests, identify areas for training improvements, and manage staff, certifications and inventory. Tracking key performance indicators makes decision-making easier and management more effective.

From the centralized **LEADERS** console, authorized users can access all EMS & Fire related data for viewing, tracking and reporting. This same centralized access allows for medical and Fire direction to perform QA/QI functions from anywhere at anytime and to securely communicate with individuals via email within the system.

LEADERS™ Features also include:

- Automated Incident Forms
- Hydrant Management
- Apparatus Management
- Rapid Access to Critical Information
- Location Mapping
- Building Inspection & Violation Data
- NFIRS 5.0 & NEMSIS 2.2 Datasets
- Standard and Ad Hoc reports

LEADERS - Features

Centralizing reporting for convenience and efficiency:

Service Administration

- Setup Customized Service Information
- Setup Staff Accounts/Permissions
- Track and Manage Employee Training
- Inventory Management and Upkeep
- View General Reports
- Schedule Automatic Report Generation
- Generate Customized Reports
- HIPAA Incident Tracking

Run Management

- QA/QI Review and Notification
- Adding and Editing Runs
- Generate Customized Run Reports
- Track and View Run History
- Customizable Knowledgebase
- Run Validation to Improve Run Accuracy

Data Management

- Import Data Quickly and Easily
- Export Data to a Centralized Database
- Export to Billing Software
- Full Search Capabilities

Efficiently Manage Staff

- Self-Service Updating for Staff Demographics
- Certification Renewal Requirements Tracking
- Administer Staff Profiles

LEADERS™ is a product developed by ImageTrend and marketed by LifeQuest Technologies
